## **Physiotherapy in a pool**

## Physiotherapy in a pool builds muscles, stimulates the respiratory organs and regulates cardiac activity.

Additionally, water massage relaxes and relieves stress. Physiotherapy in a pool is a suitable activity even in the case of people for whom ordinary exercises might be difficult – people with joint problems, paralysis, weight issues, etc. In water, you will feel lighter and performing exercises will be easier.

## Duration: 30 minutes

With a referral from a rehabilitation physician of ITK, the service is free. Without a referral, the service is paid.

## Appointments can be booked:

- by phone 666 1900 Mon-Fri 7:30-18:00
- · at the reception
