## Infertility treatment andrologist's appointment

**In the examination of infertility, the aim is to identify the reason behind the infertility and, consequently, to find the most appropriate and effective individual treatment method.**

Infertility treatment doctor:

- carries out various tests and analyses,
- refers the patient to further tests, if necessary,
- prepares a specific individual treatment plan,
- carries out an infertility treatment suitable for you and/or your partner,
- in case of indications, refers you to a consultation with a geneticist.

**Please Note! A referral letter from a general practitioner or a specialist is necessary for an appointment with a andrologist!**

**Appointments can be booked:**

- Health Portal <https://www.terviseportaal.ee/en/>
- by phone [666 1900](tel:6661900) **Mon-Fri 7:30-18:00**
- at the reception
