Physiotherapy in a pool

Physiotherapy in a pool builds muscles, stimulates the respiratory organs and regulates cardiac activity.

Additionally, water massage relaxes and relieves stress. Physiotherapy in a pool is a suitable activity even in the case of people for whom ordinary exercises might be difficult – people with joint problems, paralysis, weight issues, etc. In water, you will feel lighter and performing exercises will be easier.

Duration: 30 minutes

With a referral from a rehabilitation physician of ITK, the service is free. Without a referral, the service is paid.

Appointments can be booked:

- by phone [666 1900](tel:6661900) Mon-Fri 7:15-18:00
- at the reception
